

Tip 8: Keep the Team Focused On the Present Sprint

✓ The attention of
the team remains
at that one sprint

✗ Backlog item
✗ Something already finished

**Reminding them of what is
important now will help them focus**

**We all tend to get excited with what has to follow;
rein the team in as much as your role allows you**

In Summary

- Make sure the team does not stray, but stays focused on the present sprint.
- Constantly remind the team of what needs focus.
- Put measures in place (such as displays of the sprint goal) to serve as reminders and get the product owner to remind the team of the goals after the daily stand-up meetings.
